Powerful Care Coordination Technology for Behavioral Health

eINSIGHT
BEHAVIORAL HEALTH DATA PLATFORM

Whether someone experiences substance abuse or other mental health conditions, one thing remains constant—successful client outcomes require access to essential social services and coordinated care.

The eINSIGHT platform leverages enhanced assessment functionality, guided treatment planning, customizable reporting, a comprehensive dashboard that visualizes key client metrics, and can integrate with your existing EHR with ease.

Screen & Assess Clients

Clinical staff need to effectively determine client needs from intake to post-treatment aftercare to ensure accurate assessment that informs ongoing decisions about programs and services that improve long-term outcomes. With 30+ pre-loaded assessments and forms, eINSIGHT empowers clinical staff to rapidly and accurately identify needs and quantify severity. Client results are stored on a secure platform that is accessible from any web-enabled device.

Target Treatment & Coordinate Care

A significant obstacle to care is the challenge of timely access to clinical information about the client. The eINSIGHT platform makes efficient triage possible by informing the level of care required and guiding the development of targeted treatment plans based on each client's unique needs.

Our platform ensures that key stakeholders have access to the right data when making decisions, including easy integration with existing electronic health records (EHRs). Get more value out of your budget by increasing the productivity of your employees.

Go Paperless

With a focus on behavioral health the eINSIGHT platform enables your organization to digitally transform and access all the forms, reports, and data you need through an on-demand web portal. Save time and money while contributing to a cleaner environment.

Pre-Loaded Assessments & Forms

Choose from the Drug Use Screening Inventory (DUSI), PHQ-9, GAD-7 or a range of other popular assessments to rapidly and accurately determine client needs.

Get Up & Running in Days

Rapidly deploy the eINSIGHT platform with your chosen assessments, forms and reports. eINSIGHT is fully-configurable to your organization's unique needs—with or without EHR or other system integration.

Quantify Client Response to Treatment

Quantifying each client's response to treatment is critical for client engagement and updating their treatment plan based on the client's ongoing changes in needs and priorities. Individual client responses to treatment can be monitored within and across programs.

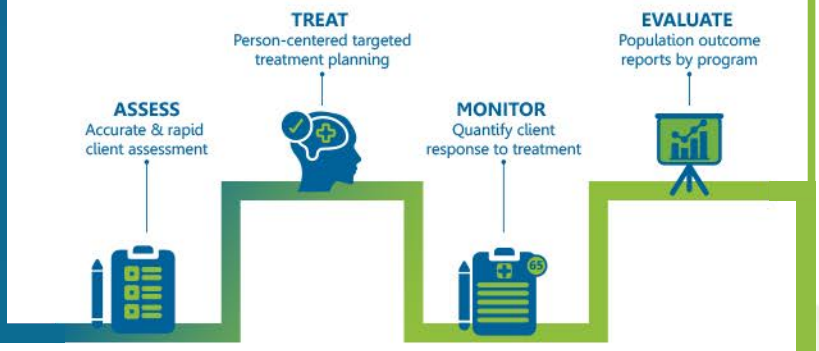
Clinicians can achieve greater accountability by ensuring client's sustain treatment gains using eINSIGHT's analytics and follow-up functionality that allow you to remotely re-assess clients and identify candidates who may be in the early stages of relapse and require proactive intervention.

Demonstrate Program Effectiveness

Organizations struggle with evaluating program effectiveness in real-time. Gone are the days of costly, after the fact, external evaluations that do little to inform decisions when they are needed most.

eINSIGHT offers a visual experience that is easy to work with so that your population health outcomes can be reported across clinicians, programs, facilities, regions and more to evaluate program effectiveness enabling you to demonstrate the impact of your programs to the county, state, or funder.

Better Productivity, Visibility & Client Outcomes



Improve Long-Term Outcomes

Long-term success requires care coordination technology that extends beyond the treatment period. With eINSIGHT you can automate post-treatment monitoring to ensure clients sustain their treatment gains and receive warnings about early signs of relapse. Clients get what they need before they develop detrimental long-term adverse outcomes.

About eINSIGHT

The eINSIGHT behavioral health data platform was developed by Dr. Steve Weatherbee and is used by organizations across North America to improve client outcomes through accurate assessment, targeted treatment planning, monitoring client response to treatment, coordinating care and evaluating program effectiveness.

The platform is used by behavioral health service providers, school systems, drug and mental health courts and corrections departments. Behavioural health problems are complex. eINSIGHT aims to bridge the gap by providing the clarity and flexibility that staff need to be efficient and effective in their work.

See how eINSIGHT is used by Behavioral Health Providers across the US and Canada to improve client mental health and reduce adverse outcomes. Click here or scan the QR code with your phone to book a custom demo.
